

Superintendent's Message

I consider it an honor and a privilege to serve as superintendent of the Fall River Joint Unified School District. I was proud to graduate from Fall River High School in 1974 and am equally proud to have come back to this great area to raise my family and work in our district since 1981.

Our district is nestled in the northeastern corner of Shasta County and includes two bordering counties. In size, we're extremely large; however, once in our school systems, students benefit from a smaller, very close-knit and nurturing school community. All children are very important, and as a district, we are highly committed to providing the best academic, social, and emotional programs which can be offered. We pride ourselves in having an outstanding staff, who strive to insure students meet our ultimate goal: for every student to graduate college and career ready. This goal mandates a determined, "no excuses" effort from all stakeholders, which also includes a very supportive governing board, that are truly committed to insure all students are successful. The school and community partnerships which are developed along the way have proven to be most rewarding to all.

Thanks to everyone for being a part of our student's success!

Sincerely,

Greg F. Hawkins
Superintendent
